Service Type Distribution

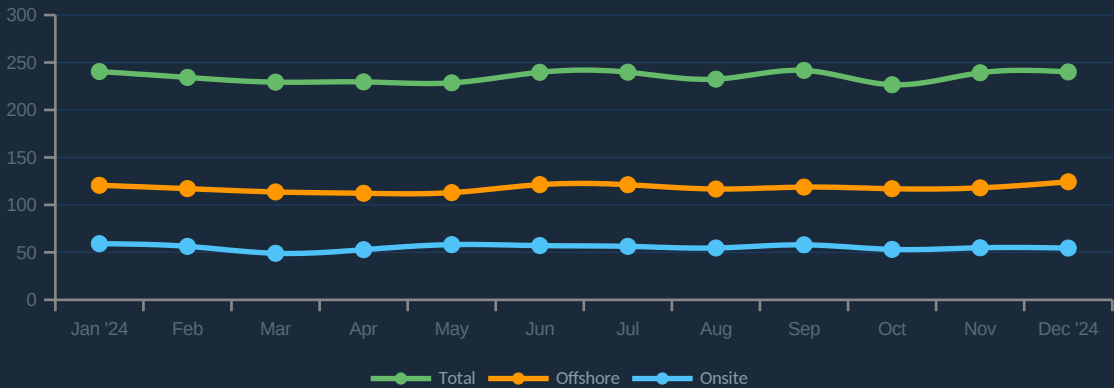

■ New Development ■ System Support ■ Admin

📄 SERVICE TYPE ANALYSIS

New Development at 53.3% signals strong forward investment. System Support (34.4%) is within the typical 30-40% band. Admin overhead at 13.0% warrants review — Echo Data Lake at 26.3% admin is an outlier.

FTE Trend — 2024

📄 TREND ANALYSIS

Total FTE stable in 226-242 range through 2024 — disciplined workforce planning. Offshore climbed to 124.3 in Dec (+6.4 MoM), the highest of the year. Onsite fluctuated 49-59 FTE, serving as the flex lever. The 2.1:1 consultant-to-employee ratio warrants monitoring for knowledge retention risk.

⚠️ TOP ALERTS — High Offshore Concentration (>55%)

Program	Onsite	Offshore	Off %
Meridian API Gateway	0.4	6.4	70.3%
Atlas Data Platform	1.7	7.0	67.3%
Compass Loyalty Program	2.0	6.2	65.3%
Relay ETL Pipeline	1.0	7.9	64.2%
Echo Data Lake	0.9	7.9	59.4%
Orbit Feedback Engine	2.2	8.9	57.1%
Prism Customer Portal	2.9	8.2	56.2%

🔍 ALERT ANALYSIS

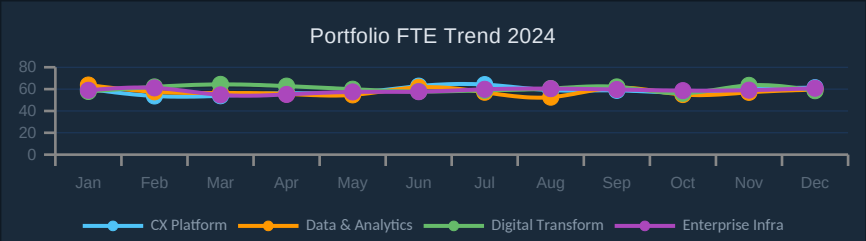

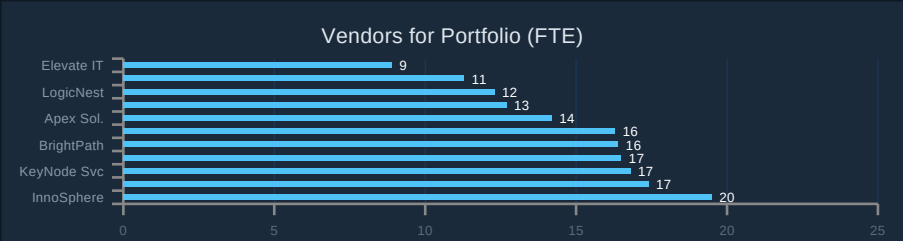

Meridian API Gateway (70.3%) and Atlas Data Platform (67.3%) carry significant offshore concentration risk. High offshore ratios >65% impact incident response times and create timezone coordination challenges. Consider rebalancing with nearshore resources.

✅ TOP PERFORMERS — Balanced Distribution (Onsite >30%)

Program	Onsite	Offshore	On %
Beacon Self-Service Hub	4.0	2.7	47.6%
Nexus Identity Management	3.8	2.3	47.5%
Fortress Security Hardening	5.7	4.6	38.5%
Pulse Notification System	4.5	7.2	34.1%
Keystone Config Management	4.6	8.0	31.7%
Zenith Reporting Engine	2.6	3.2	30.6%
Catalyst Process Automation	2.9	4.8	30.5%

🔍 PERFORMER ANALYSIS

Beacon Self-Service Hub (47.6%) and Nexus Identity Management (47.5%) lead with strongest onsite presence, enabling better stakeholder alignment. These programs also show strong YoY growth (+20% and -5.9%), correlating onsite engagement with delivery success.

Teams Supporting the Portfolio

Active Projects — % of Effort

📊 LOCATION ANALYSIS

Offshore dominates at 51.8%. The 2.1:1 consultant-to-employee ratio is consistent with an outsourced delivery model. Low onsite (22.7%) means a lean team coordinating offshore delivery.

📊 DEPARTMENT ANALYSIS

Data Services (34.7 FTE) is the largest department. QA at 27.3 FTE = 11.4% allocation to testing. Regional delivery centers (APD/EMEA) confirm a follow-the-sun model.

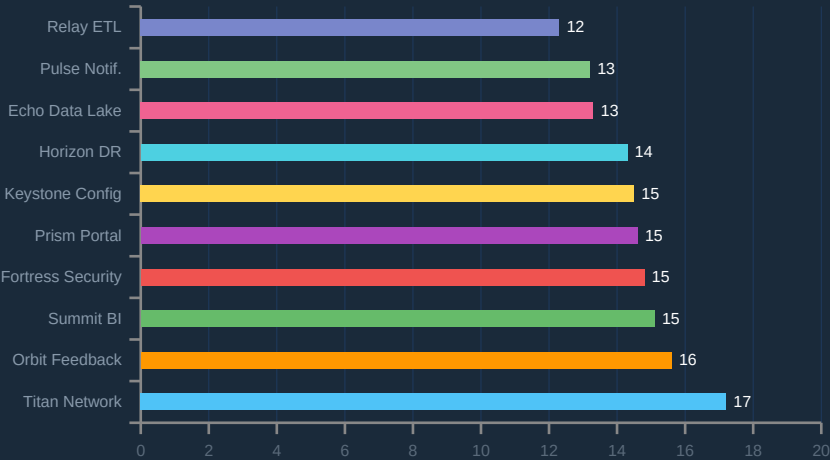

📊 EFFORT ANALYSIS

53/34/12 split (Dev/Support/Admin) is healthy. Platform Migration (65 FTE) and Greenfield Build (62.6 FTE) show near-equal investment in modernization vs. new capabilities.

📊 KEY INSIGHT

The organization's 53.1% allocation to New Development signals a growth-phase portfolio. Six departments exceed 50% offshore, but none breach the 60% critical threshold. Quality Assurance has the most balanced location distribution (28.2% onsite, 33.7% nearshore, 38.1% offshore) — a model worth replicating across other teams.

Top 10 Programs by FTE

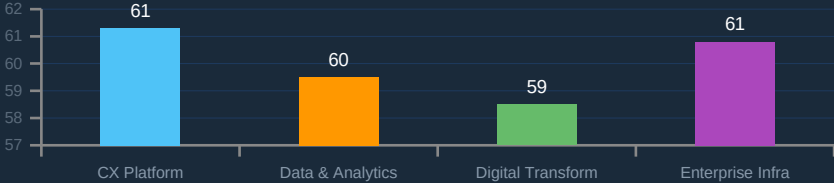

PROGRAM ANALYSIS

Top 3 programs (Titan, Orbit, Summit) = 47.9 FTE or 20% of total. FTE is well-distributed — no single program exceeds 7.2% of total, indicating good diversification. Portfolio allocation is remarkably balanced across all 4 portfolios (~60 FTE each).

PORTFOLIO INSIGHT

All 4 portfolios hover around 58-61 FTE in Dec 2024 — an unusually even distribution that reduces concentration risk and supports parallel strategic initiatives. Digital Transformation has slightly pulled back from its 2022 peak of ~65 FTE.

FTE by Portfolio

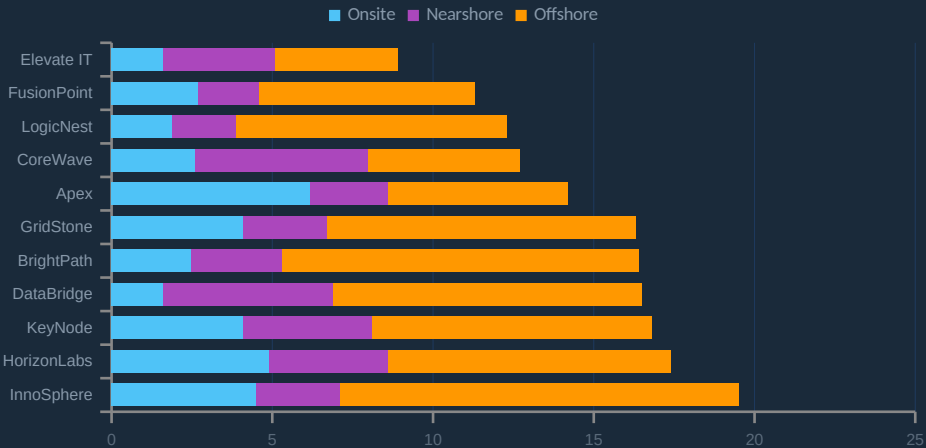

GROWTH & DECLINE — YoY Change

Program	FTE	MoM	YoY %
Summit BI Dashboard	15.1	+5.4	+26.9%
Zenith Reporting Engine	8.5	+0.1	+23.2%
Beacon Self-Service Hub	8.4	-0.5	+20.0%
Horizon Disaster Recovery	14.3	+2.5	+17.2%
Vertex ML Platform	10.3	-1.0	-23.1%
Meridian API Gateway	9.1	-2.4	-18.0%
Fortress Security Hardening	14.8	-0.1	-15.9%
Echo Data Lake	13.3	-0.8	-14.7%

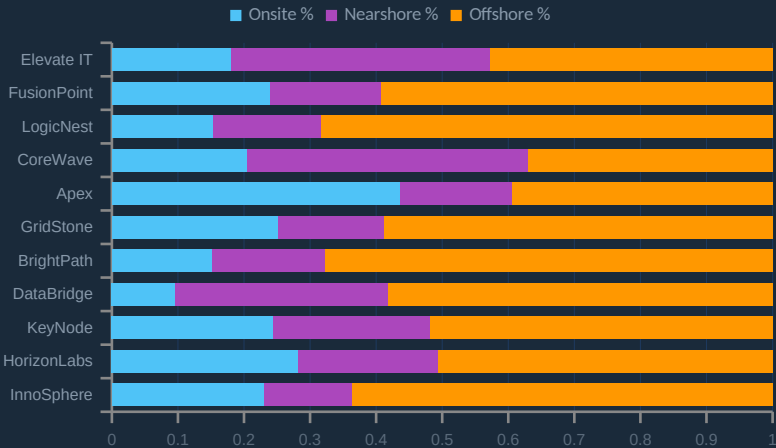

MOMENTUM ANALYSIS

Growth leaders: Summit BI (+26.9% YoY) and Zenith Reporting (+23.2%) both in Data & Analytics, confirming analytics investment thesis. Declining: Vertex ML (-23.1%) and Meridian API (-18.0%) contracting — verify if planned phase-downs or unintended attrition.

Vendor FTE by Location

Vendor Location Mix (%)

VENDOR CONCENTRATION

InnoSphere (19.5 FTE) is the top vendor at 12% of consultant FTE. Vendor landscape is well-distributed with 11 active vendors. Top 3 vendors = 33% of consultant FTE — moderate concentration risk. CoreWave has highest nearshore ratio (42.5%) while BrightPath is most offshore-heavy (67.7%).

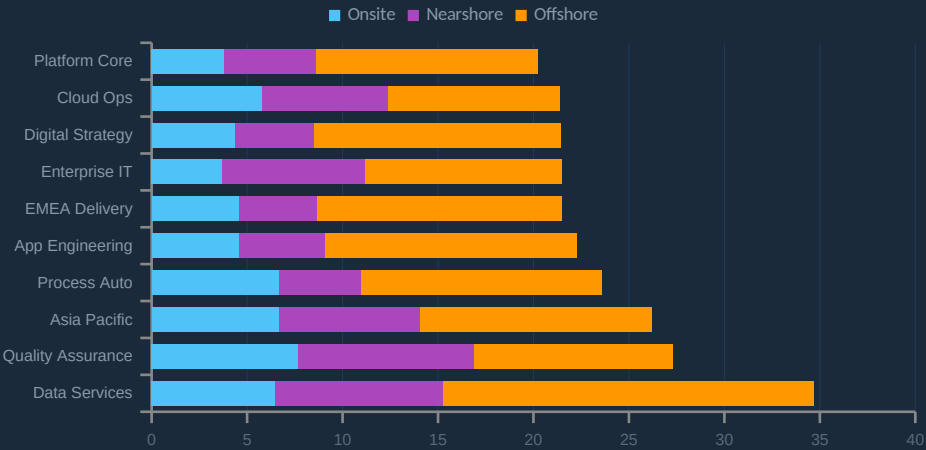

VENDOR RISK ASSESSMENT

Apex Solutions has best onsite/offshore balance (43.7% onsite) — ideal for client-facing work. DataBridge and LogicNest are heavily offshore-leaning (>58% offshore, <10% onsite), suitable for backend work but risky for programs requiring rapid iteration. Recommend vendor-program alignment review.

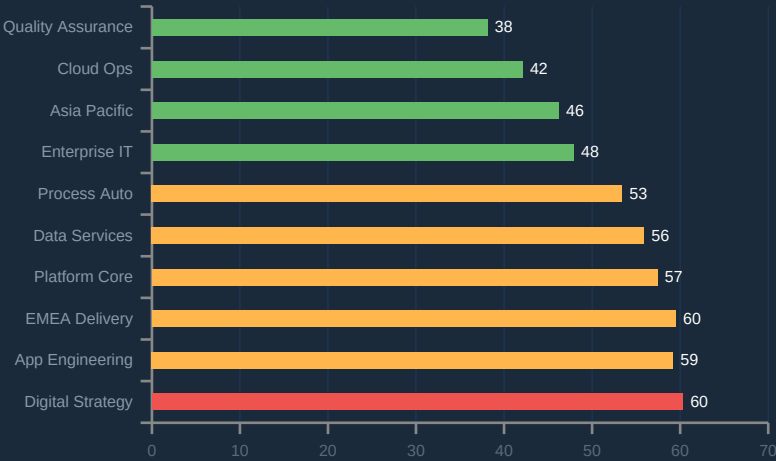

PROGRAM × VENDOR MATRIX (Top 5 Programs)

Program	Inno	Horizon	Key	Data	Bright	Grid	Apex	Core	Logic	Fusion	Elev	Total
Titan Network	2.8	2.1	1.6	1.5	1.3	1.2	1.1	0.9	0.8	0.4	0.2	13.9
Orbit Feedback	1	0.6	0.4	1.4	0.5	0.5	1.6	1	0.9	1	0.6	9.5
Summit BI	1.5	0.7	1.2	1.3	2.3	1.7	0.5	0.9	0.6	0.1	0.2	11

Department FTE with Location Breakdown

Offshore % by Department (Risk Ranked)

DEPARTMENT DETAIL TABLE

Department	Total FTE	Onsite	Nearshore	Offshore	Onsite %	Offshore %	Risk
Data Services	34.7	6.5	8.8	19.4	18.7%	55.9%	MED
Quality Assurance	27.3	7.7	9.2	10.4	28.2%	38.1%	LOW
Asia Pacific Delivery	26.2	6.7	7.4	12.1	25.6%	46.2%	LOW
Process Automation	23.6	6.7	4.3	12.6	28.4%	53.4%	MED
Application Engineering	22.3	4.6	4.5	13.2	20.6%	59.2%	MED
EMEA Delivery	21.5	4.6	4.1	12.8	21.4%	59.5%	MED
Enterprise IT	21.5	3.7	7.5	10.3	17.2%	47.9%	LOW
Digital Strategy	21.4	4.4	4.1	12.9	20.6%	60.3%	HIGH

Key Findings

□ Stable Workforce

240.1 FTE maintained in a tight 225-248 band over 36 months, demonstrating disciplined capacity planning. No unplanned growth or sharp declines.

□ Offshore Dominance

51.8% offshore ratio is the highest of 2024 (Dec spike to 124.3 FTE). 7 programs exceed 55% offshore — monitor for response time and coordination risks.

□ Growth in Analytics

Summit BI (+26.9% YoY) and Zenith Reporting (+23.2%) lead growth, both in Data & Analytics. Investment thesis in analytics capability is validated.

⚖️ Balanced Portfolios

All 4 portfolios hover at ~60 FTE each — unusually even distribution that reduces concentration risk and supports parallel strategic execution.

□ Vendor Diversification

11 active vendors with top 3 representing 33% of consultant FTE. Healthy diversification but watch single-program vendor dependencies like KeyNode in Echo Data Lake.

⚠️ Admin Overhead Watch

Overall 13.0% admin is manageable, but Echo Data Lake (26.3%) and Phoenix Cloud Migration (24.6%) have excessive admin — investigate process inefficiencies.
